Abstract

- 1. the research conducted, including the rationale
- 2. methods
- 3. key results
- 4. the main conclusion, including the key points of discussion

Introduction

How fast can people run compared to other animals (Denny [2008](#))?

Methods

Subsection 1

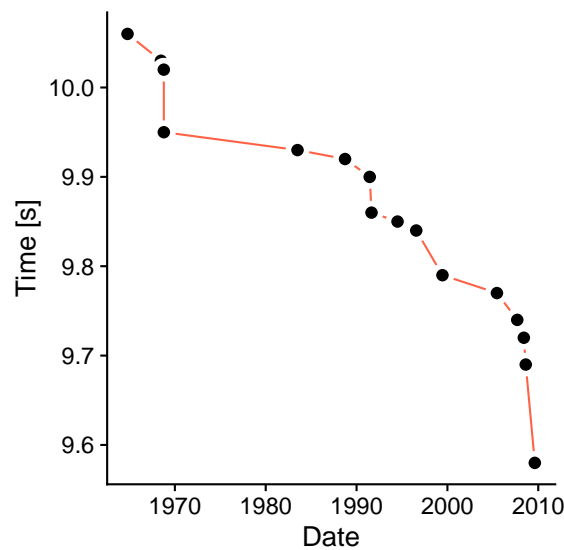

I looked at how athletic world records changed through time.

Subsection 2

The second [Methods](#) subsection.

Results

Figure 1. Example of a margin caption. Setting up your figure + caption like this looks fancy and does not disrupt the flow of the text. But it requires more manual adjustments (position, spacing, labeling) compared to using standard \LaTeX figure environments.

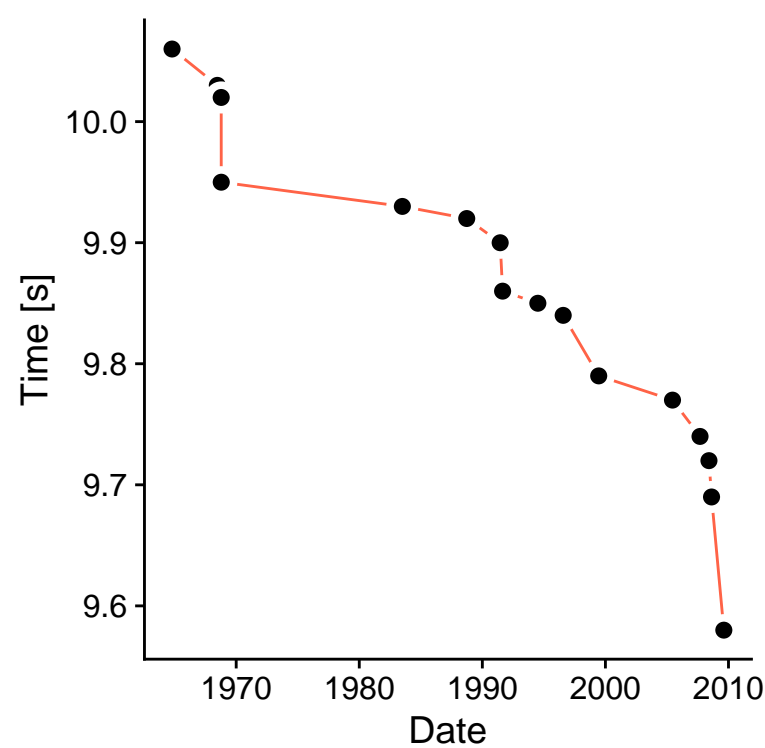

Figure 2. Example of a standard floating figure. A-F, This figure is wrapped into the standard floating environment.

Discussion

People are getting faster!
